School of Robotics

一、软件和环境配置

■ **VS code:** <https://code.visualstudio.com/>

■ **Anaconda:** <https://www.anaconda.com/>

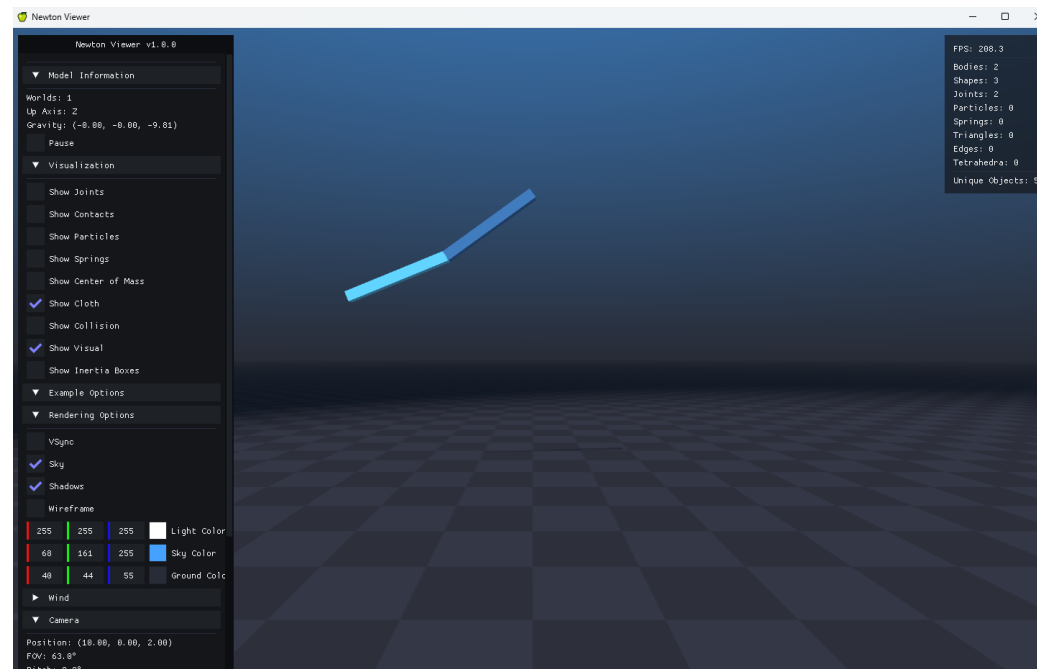

■ **Anaconda Prompt 输入** `conda create -n newton python=3.11`

一、软件和环境配置

- Anaconda Prompt 输入 `conda activate newton`
- 继续输入 `pip install "newton[examples]"`
- Newton github网页 <https://github.com/newton-physics/newton>
- Newton 测试示例 `python -m newton.examples basic_pendulum`
- 更多示例可查看github网页

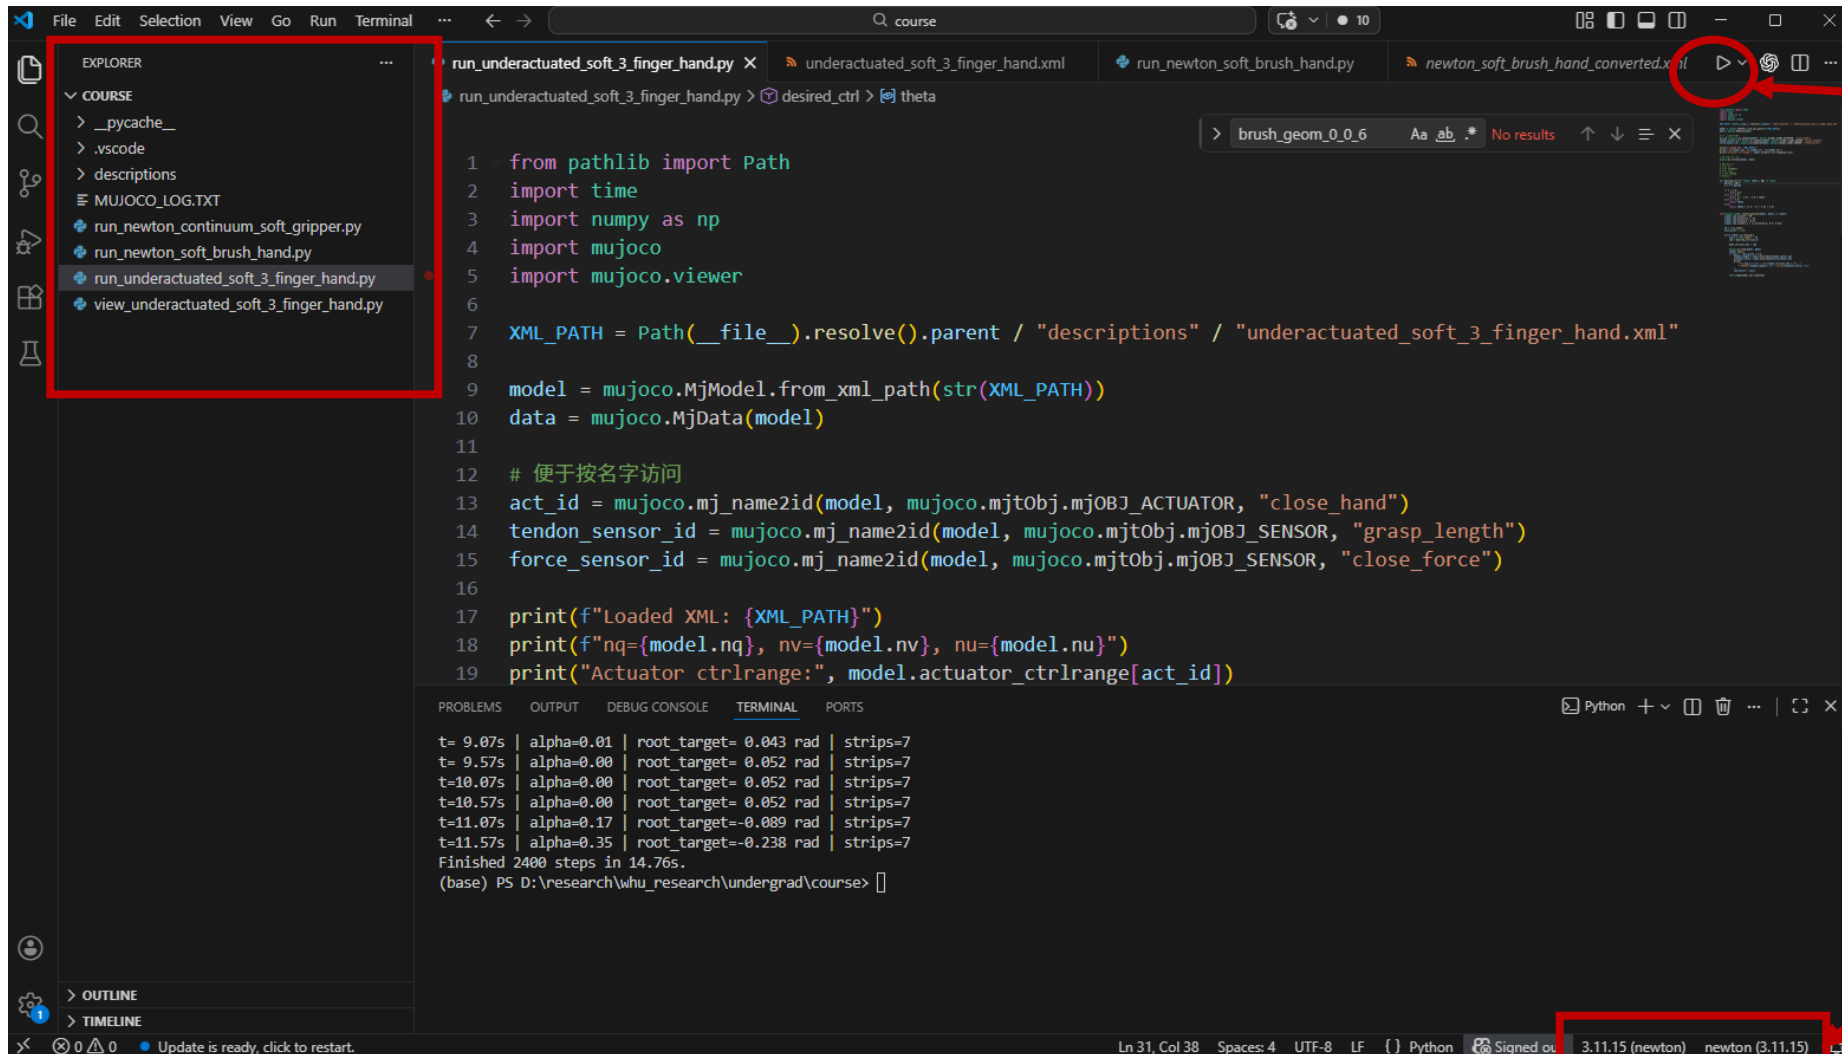

```
Anaconda Prompt - "D:\softw...  
(base) C:\Users\xiaog>conda activate newton  
(newton) C:\Users\xiaog>  
(newton) C:\Users\xiaog>pip install "newton[examples]"
```
